

## INTERRUPTIBLE UNBUNDLED PRODUCTS

Moravia Gas Storage a. s. offers long-term and short-term bundled products on a firm basis through electronic auctions.

In addition to firm bundled capacities existing storage customers may also use interruptible unbundled products. The availability of interruptible injection and withdrawal products depends on actual utilization of firm storage products and is limited by the technical parameters of the storage facility and the respective working gas volume related to the firm bundled product.

Interruptible unbundled capacities have been designed to increase the flexibility of previously booked firm bundled products as well as to optimize the customer's portfolio since these products are offered on a daily basis.

Prices for interruptible unbundled products:

Period	Withdrawal (EUR/MWh)	Injection (EUR/MWh)
01.04.17 – 30.09.17	0.4	0.5
01.10.17 – 31.04.18	0.5	0.4

Prices are inclusive of fuel gas, electricity and emissions costs and exclusive of applicable taxes. Only utilized interruptible products are subject to pricing.

Available interruptible products are published on the MGS web-site:
