

Information on the change of auction conditions

Dear applicants for the auction announced for 30 September 2020:

Due to an unprecedented crisis, which affects the whole region, we have recently gathered information on an important slowdown of various intra-company procedures and channels of communication from various companies.

Because the crisis hit us all in the middle of the period leading to the auction, company MGS has decided to simplify auction terms in the following manner:

- Point 2 of the auction conditions is hereby changed and applicants shall provide neither the copies (scans) of documents necessary for registration mentioned in Part II of the Code, nor their originals.

We hope that the measure will allow you to utilise available capacities of your companies and lead to a successful auction.

Moravia Gas Storage a.s.
